### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/28/2007 has been entered.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: no prior art alone or in combination was found to disclose or suggest the claimed oligomerization process comprising hydrating an olefin feed, employing a surface-deactivated ZSM-23 catalyst, and wherein the product contains at least two of methyl, ethyl, and propyl branches. The closest applied prior art discloses a product having only methyl branching. There is no suggestion the combination of hydrating the feed and using a surface-deactivated ZSM-23 catalyst would result in the product having the claimed branching.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
